

How do I set up Safari on a Mac?

Safari Setup Instructions:

1. Open Safari.
2. Use the File pull down menu and choose **Print...**
3. Expand the Print dialog.
4. Make sure **Safari** is chosen in the fourth drop down list box.
5. Make sure the **Print Backgrounds** check box is checked.
6. Make sure the **Print Headers and Footers** check box is unchecked.
7. Press **Print**.

Un-block pop-up windows: Some SpEd Form pages include "pop-up" windows that open to display more information or as a way for you to edit certain fields. By default, pop-up window blocking is enabled in Safari 4 and later. To not block SpEd Forms pop-up windows, you will need to uncheck "Block Pop-Up Windows" from the Safari Settings Menu.

Allowing Pop-ups in Safari

1. Select "Safari" on the main tool bar.
2. If the "Block Pop-Up Windows" option is checked, select it to uncheck it and unblock pop-up windows.
